Victoria Versa

The most popular high performance model of Victoria especially suitable for wards, operating rooms, recovery rooms, ICUs, obstetrics and endoscopic applications, etc.

Victoria Lipos

High performance solution designed particularly for liposuction and operating rooms.

Victoria Portable

Quiet and effective suction unit for medical practices, wards and endoscopic applications, as well suitable for fast suction in any situation.

Victoria Portable with eurorail

Advantage of the unit is that instead of regular holder, unit is equipped with eurorail 25 x 10 mm this allows you to use your holders and jars.

Victoria Thorax

A suction unit specially designed for common use as well as for thoracic and abdominal surgery drainage and intensive care. The system can be used for long-term up to 30 days continuous drainage.

Thanks to a unique patented solution Victoria Thorax enables full suction output even during drainage.
