

Quality Policy of CHEIRÓN a.s.

The quality policy of CHEIRÓN a.s. is based on the basic intention to maintain and develop a very good position of the important Czech manufacturer of its own medical devices, electric suction devices Victoria and Dynamic II, supplying medical devices of other manufacturers, providing professional maintenance and other services. Another aim is to present and develop the sales of CHEIRÓN a.s. products abroad. The services provided and the technical parameters of the products offered must meet all real customer requirements and the requirements of applicable regulations.

In order to achieve this goal, CHEIRÓN a.s. will create conditions for:

- Development of a quality management system based on the priority of fulfilling actual and expected customer wishes.
- Innovation of the offer and technical parameters of the supplied products.
- Maintaining the required quality of our own products, Victoria and Dynamic II electric suction devices
- Expert competence of the company staff who inform the customer about the products offered by CHEIRÓN a.s.
- Expert and fast servicing of products supplied by CHEIRÓN a.s.
- Setting and review of quality objectives by management.
